Alda Delas

Software Engineer

• aldadelas07@gmail.com • +6281322084991 • Indonesia

SUMMARY

- Experienced in Designs, develops and maintains complex software applications, ensuring scalability and performance.
- Proficient in multiple programming languages, frameworks, and architectures.
- Experienced in leading technical teams, provides guidance to junior developers and collaborates with cross-functional teams.

EDUCATION

Telkom University, School of Computing	Bandung, Indonesia
Bachelor of Computer Science	August 2019
Emphasis, Software Engineer	Major GPA: 3.31/4.00

TECHNICAL SKILLS

Programming Languages: NodeJS, Typescript, Javascript, Golang, PHP
Database: MySQL, PostgreSQL, MongoDB, DynamoDB, Redis
Framework: NestJS, React Native, ReactJS, Angular, ExpressJS, VueJS
Tools: Git, Docker, AWS, CI/CD, Gitlab, Github, Livekit, Langflow

WORK EXPERIENCE

PT Kokatto Teknologi Global — Jakarta, Indonesia
Software Engineer — June 2021 - Present

- Develop new features in communication platform including WhatsApp, email, SMS, and voice call
- Maintain scalability and performance of Kokatto CPaaS specifically for outbound communication
- Lead the development of Kokatto CPaaS for outbound communication consists of 3 people
- Tools and Technologies: AWS, Nodejs, Typescript, Javascript, NestJS, VueJS, MongoDB, Redis, Gitlab, Docker

PT Artha Puncak Semesta Indonesia — Bandung, Indonesia
Fullstack Engineer — October 2019 - March 2021

- Design, develop and maintain web application coredataq and coreworq
- Maintain embedded system coredataq
- Tools and Technologies: Codeigniter3, PHP, MySQL, Java, Apache, Javascript, Jquery, Bootstrap, HTML, CSS

PROJECTS

Kokatto Automated Notification, Software Engineer — June 2021 - Present

- Kokatto Automated Notification is a platform that allows users to integrate with multiple communication channels.
- Develop integration features for WhatsApp Business API, Email, SMS, and Voice Call
- Develop integration WhatsApp incoming call for business, AI Agent for voice call collection
- Tools and Technologies: NodeJS, Typescript, AWS, MongoDB, Redis, NestJS, VueJS, Git, Docker, Livekit, Langflow

Coreworq, Fullstack Engineer — January 2021 - March 2021

- Internal web application to manage employee information
- Create and develop features from scratch based on designs created by the design team such as employee management, leave management, etc.
- Tools and Technologies: Codeigniter3, PHP, MySQL, Javascript, Jquery, Bootstrap, HTML, CSS

Coredataq, Fullstack Engineer — January 2020 - December 2020

- Web dashboard application to monitor coal production movements in mining
- perform server installation in mining area
- Design, create and develop dashboard features from scratch such as coal production, fuel consumption, number of active vehicles, etc.
- Tools and Technologies: Codeigniter3, PHP, MySQL, Javascript, Jquery, Bootstrap, HTML, CSS

CERTIFICATION

AWS Certified Solution Architect, Associate — October 2025 - October 2027
